WORK EXPERIENCE

Curieo - Software Development Intern   **March '17 - Present**
Leading the development of Programming module for Curieo's Educational platform. The module aims at creating a student friendly platform for a better learning experience relevant to programming courses.

PROJECTS (WEB DEVELOPMENT)

Public Blog (RESTful) (Github) (Live Project)
Public blogging website for personal use. Provides all the functionality of a blog for both, the blogger as well as the reader including creation, deletion and updation of posts, searching by keyword and also its use as an API (RESTful)
Technologies used :
- Backend : Python, Django, Django REST Framework
- Database : PostgreSQL
- Frontend : HTML, CSS, Bootstrap

MicroBlog - Private diary (Github) (Live Project)
MicroBlog provides a platform for maintaining a private diary/journal. The user can register/login to create entries in the diary and the entries of that specific user are the only ones he has access to.
Technologies used :
- Backend : Python, Flask
- Database : MySQL
- Frontend : HTML, CSS, Bootstrap

MVP Landing (Github)
Basic design for the landing page of a Minimum Viable Product (MVP) including features Login, Signup, Subscriptions, Email verifications etc.
Technologies used :
- Backend : Python, Django, Django Registration Redux
- Database : SQLite3
- Frontend : HTML, CSS, Bootstrap

PROJECTS (ACADEMIC)

Input data validation (Github)
Created a library of functions for input data validation. It includes validation of name, phone number, institute roll number, etc.
Technologies used :
- C

Graphical comparison of Sorting Algorithms (Github)
Compared different sorting algorithms on the basis of time and steps required by an algorithm to sort a randomly generated data set. Algorithms taken under observation : Bubble sort, Merge sort, Selection sort, Quick sort and Insertion sort. Technologies used :

- C, Shell script for data set generation and time and steps observation.
- LaTeX, Beamer for report generation and presentation.
- GNU Plot for plotting of observed statistical data.

More projects on Github account.

TECHNICAL SKILLS	**Languages**: Python, C, C++, Java **Web Development(Backend)**: Django, Flask, Django REST Framework **Web Development(Frontend)**: HTML, CSS, Bootstrap **Databases**: MySQL, PostgreSQL, SQLite **Scripting**: Shell **Others**: Command Line **Platforms**: Linux
COURSES COMPLETED	**Computer Science and Engineering** Computer Programming, Discrete Mathematical Structures, IT Workshop, Data Structures and Algorithms, Digital Circuits and Systems
ACHIEVEME-NTS	Secured 1st position in district level Programming Contest. Secured 1st position in school level Programming Contest.
POSITIONS OF RESPONSIBIL-ITY	Teaching Assistant (TA) for Computer Programming course. June '16 - Dec '16 Active core-member(Web development div.) of Computer club. July '16 - Present Organizing team member of LNMHacks (hackathon). July '16 - Present Active member of Literary Club. July '15 - Present
